AI-first RevOps professional at Domo who manages the GTM stack and engineers the AI tools and workflows the revenue org uses. I run CRO/CMO pipeline reporting and executive analytics, while building the agentic systems and LLM tooling. The customer work has produced \$1.2M+ in measurable impact; the internal footprint runs deeper.

EXPERIENCE

Domo American Fork, UT

RevOps Analyst & AI Engineer Dec. 2025 – Present

- Led first 3 FDE onsite with customers, delivering AI solutions that generated \$1.2M in immediate pipeline
- Run CRO/CMO pipeline reporting: MQL conversion trends, pipeline hygiene, Google keyword performance, and sales efficiency to guide operational decisions across sales and marketing
- Developed and own a suite of internal AI-powered revenue tools, including pipeline visibility and intelligence, call review and coaching, sales roleplay, and pre-call briefing used daily by the revenue organization
- Designed and implemented a new BDR comp plan, including financial modeling and cost-neutral scenario analysis to increase rep incentives without adding program cost

Account Development Operations Analyst Feb. 2025 – Dec. 2025

- Built automated workflows to surface old opportunities and historical account context generating \$500K in new logo revenue within 3 months
- Led free trial redesign that improved MQL to SAL conversion 32%, cut time-to-first-onboarding 71%, and doubled attendance rates through end-to-end lifecycle restructuring
- Conducted analysis into a persistent decline in marketing-sourced SALs, identifying an indirect relationship: outbound email volume from BRDs was seeding inbound marketing leads, and a 5x reduction in outbound headcount had caused the drop, a structural attribution gap that reframed the team's pipeline strategy
- Built Clay and Apollo.io workflows with custom prompt engineering to surface prospect pain points and generate personalized outreach at scale, reducing manual research time per rep

Account Development Manager April 2024 – Jan. 2025

- Partnered with Account Executives and CSMs to uncover upsell opportunities across the customer base through strategic account reviews, new user engagement campaigns, and executive-level customer events
- Sourced various qualified opportunities contributing net new ARR pipeline through proactive discovery and cross-functional account coordination

EDUCATION

Master of Science in Business Analytics

University of Utah, David Eccles School of Business
Dec. 2024

Bachelor of Science in Information Systems

University of Utah, David Eccles School of Business
May 2023

SKILLS

RevOps

Funnel Analytics, Attribution Modeling, Pipeline Reporting, Conversion Optimization, Lead Lifecycle Design, Comp Design
